Run The Application

- Open anaconda prompt from the start menu
- Navigate to the folder where your python script is.
- Now type "python app.py" command
- Navigate to the localhost where you can view your web page.
- Click on the predict button from the top right corner, enter the inputs, click on the submit button, and see the result/prediction on the web.

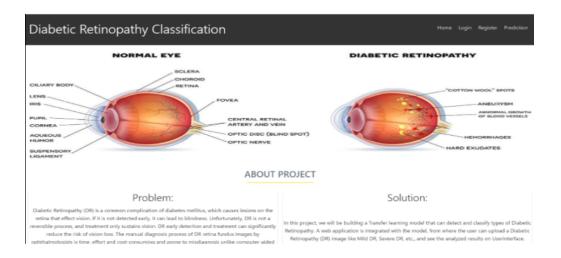

1: Run the application

In the anaconda prompt, navigate to the folder in which the flask app is present. When the python file is executed the localhost is activated on 5000 port and can be accessed through it.

2: Open the browser and navigate to localhost:5000 to check your application

The home page looks like this. You can click on login or register.

While logging in you need to provide your registered credentials,
After successfully login you will redirect to the prediction page where we have to
upload the image to predict the outcomes.
